

Popular Wedding Album Making Trends

by Kari Nordeen, Creative Memories www.creativememories.com

A wedding is a day full of celebration and memories. Today, many brides and brides-to-be are choosing to create personalized wedding scrapbooks that reflect their celebration in a unique and meaningful way.

A personalized wedding album can be completed quickly and easily using easy-to-use speed tools and photo safe products. Each album is as unique as the couple's memories it holds, and can range from very simple to extravagant or anything in between-there is no right or wrong way to make a scrapbook.

Following are some popular wedding-themed album making trends:

-Create the perfect guest book. Many brides are choosing to create a guest book that includes photographs of their special guests on each page. This little book, filled with photos of the bride or groom with each guest would provide a thoughtful backdrop for attendees to share their wishes with the couple.

-Design a photo keepsake album for bridesmaids. Using only a few photographs and written memories, brides can assemble beautiful and meaningful keepsakes that the wedding party will treasure.

-Design an album that showcases a growing family tree. Creating a family tree provides future generations with valuable information about their family heritage. Brides can merge their lineage with their husband's, and create an album that will showcase a new and growing family.
